## Overview

Created by ex-Senior Scotland Yard Detectives, you'll have the opportunity to learn all about the inner workings of forensic investigation in a bid to solve a gruesome crime. Collect and analyse evidence from the crime scene and construct photo-fits to catch the killer! Encourages lots of independent thinking, problem-solving and teamwork.

## What's Included?

- ✓ Experienced event manager to host your event
- ✓ Forensic equipment and materials to assist your work through the mystery
- ✓ Well-kept equipment, tools & resources such as body suits, masks & gloves
- ✓ Software to construct photo fits and use other materials to try your hand at finger print removal and blood splatter analysis
- ✓ Full risk assessments & £5million public liability insurance

## Benefits

- ✓ Learning New Skills
- ✓ Enhancing Resourcefulness
- ✓ Team Bonding
- ✓ Idea-Sharing
- ✓ Memorable Experience
- ✓ Sense of Achievement

## What happens at your event?

This activity will begin with a short briefing from your event host. They will explain how the event will run and explain the backstory to the murder before handing out your crime scene investigation packs, which will include everything you will need to solve the crime.

During the activity, participants will have the chance to learn and try their hand at collecting fingerprints, analyse DNA on blood splatters and hair samples and collect crucial evidence to help them uncover the means and method behind the murder.

By the end of the activity, your facilitator will wrap up the session by asking each team who they think the culprit is and how they came to that decision. They will eventually reveal the truth and show you any evidence or clues you may have missed along the way.

**Some of the methods you'll use...**

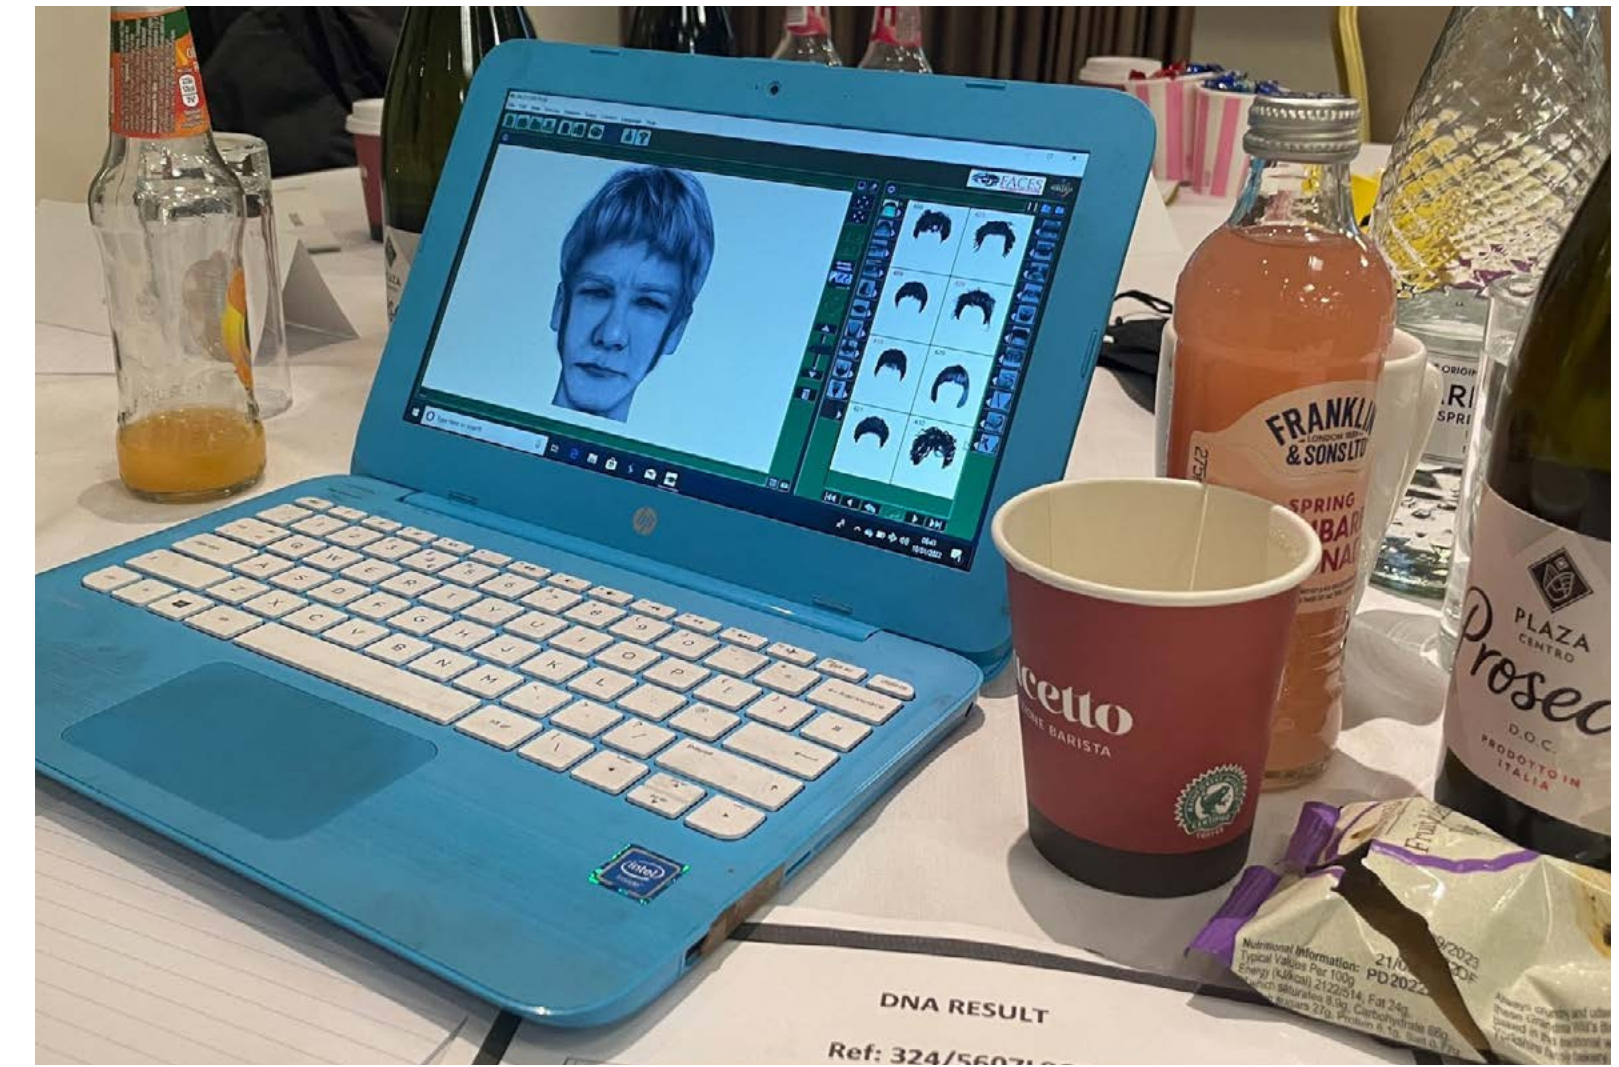

## DUSTING & LIFTING PRINTS

Analyse key pieces of evidence and use modern techniques to extract fingerprints from them, bringing you closer to finding the culprit.

## BLOOD SPATTER ANALYSIS

Learn how to analyse blood splatters by determining the trajectory and pattern of the blood to uncover which object was used to do it, and therefore, the potential murder weapon.

## FACIAL RECONSTRUCTION

Use FBI-grade software to construct a photo-fit of your culprit using the clues you've collected. Choose from 100's of different facial features like hairstyles & eyes to create an image that may, or may not, match the culprit!

**But that's not all!** Other tasks include - Analysing DNA, collecting hair samples, microscopically examining ballistics...
